ALERT – PSI's New Scheduling Platform

Effective immediately, PSI has a new platform to make it easier to schedule an exam. Click this link to access the testing portal.

Candidates must utilize a work or personal email address in order to create their personalized candidate portal account. If a candidate or group of candidates were sent to PSI with a single (utility or employer) email address, they will still need to use a personal (unique to them) email address to create a Portal account. After creating an account, each candidate will have access to the portal that allows them to schedule new appointments, modify existing exam appointments, and access score reports after an exam.
