I. EXECUTIVE SUMMARY

INTRODUCTION

In 1994 the South Carolina Legislature created the South Carolina Department of Labor, Licensing and Regulation (LLR) by combining 40 separate state agencies including the Department of Labor, the State Fire Academy, the Office of the State Fire Marshal and 38 professional and occupational licensing boards. Legislators envisioned an organization that would promote efficiency and build accountability while delivering the highest level of customer service. In January 2003 Governor Mark Sanford appointed Adrienne Youmans, the Agency Director. The agency's mission, values and strategic goals follow.

MISSION, VALUES AND STRATEGIC OBJECTIVES

Mission

The mission of the Department of Labor, Licensing and Regulation is to promote and protect the health, safety and economic well-being of the public through regulation, licensing, enforcement, training and education.

Our mission goes hand-in-hand with the Governor's effort to raise personal incomes of South Carolinians by creating a better environment for economic growth, delivering government services more openly and efficiently, improving quality of life, and improving our state's education.

LLR accomplishes its mission by:

- Promoting an environment of growth and innovation which allows regulated businesses and professionals to operate successfully and free of overly restrictive and unwarranted regulation.
- Providing cost efficient administration and periodic review of licensing and certification programs to assure the appropriate protection of the public.
- Conducting required inspections, complaint investigations, and enforcement activities in a manner that is fair, accountable and cost effective.
- Providing businesses and industry, the fire service, our licensees and the public relevant training and education programs.

Values

Integrity – It is our most fundamental value. Acting honestly, objectively and ethically is the right way to do business and provide services. It is how we build long-term trusting relationships.

Excellence – We strive for exceptional performance and service, take pride in our work and continually seek to improve.

Accountability – As individuals and as a department, we are accountable to the public and to each other for all of our actions.

Agency Goals

- Goal # 1: Improve the effectiveness of agency programs.**
- Goal # 2: Improve the efficiency of agency processes and systems.**
- Goal # 3: Provide the necessary resources to improve the agency's ability to provide efficient and effective services.**

OPPORTUNITIES AND BARRIERS

Opportunities to our mission include:

Several new bills were passed this past legislative session that will significantly affect the Office of the State Fire Marshal. The State Fire Marshal is meeting with appropriate staff internally and affected clients externally to ensure the successful implementation of the legislation. The legislation includes:

Act TBD (4470) authorizes tax credits and exemptions to encourage the installation of fire sprinkler systems in commercial and residential structures.

The legislation also provides that neither the Fire Marshal nor a governing body of a county or municipality shall enforce that portion of either the International Fire Code or a nationally recognized fire code that prohibits natural cut trees from being located in places of worship which do not fall within the exceptions provided for structures that have approved automatic sprinkler systems installed in accordance with the International Fire Code or a nationally recognized fire code.

Act TBD (4900) is the "Reduced Cigarette Ignition Propensity Standards and Firefighter Protection Act," which requires cigarettes sold in S.C. to be manufactured so that they will extinguish themselves if left unattended. Manufacturers must pay a certification fee for each cigarette brand style to the State Fire Marshal to defray the costs of the Act's processing, testing, enforcement, and oversight activities. The fee is initially set at \$250, but the State Fire Marshal is authorized to annually adjust the fee to ensure that actual costs are defrayed. Manufacturers are

required to maintain copies of the reports of tests conducted on cigarettes for a period of three years, and must make copies of these reports available to the State Fire Marshal and the Attorney General upon written request. The State Fire Marshal has contacted states around the nation who have similar laws for help in the implementation of this bill. He has also attended a conference on the subject.

Act 309 bans arsonists from firefighting duties. This Act revises provisions relating to a criminal records check for a firefighter, so as to provide that no person may volunteer as a firefighter, be employed as a firefighter, or perform firefighting duties if he has been convicted of, pled guilty to, or pled no contest to arson.

Act 296 is the Emergency Management Assistance Compact. The purpose is to provide for mutual assistance between the states entering into this compact in managing any emergency or disaster that is duly declared by the governor of the affected state(s), whether arising from natural disaster, technological hazard, man-made disaster, civil emergency aspects of resources shortages, community disorders, insurgency, or enemy attack.

Another opportunity for our agency is Act 280, Illegal Immigration Reform Act, which designated LLR as the lead agency for its implementation. LLR must establish a program to register Immigration Assistance Services and ensure their compliance with the act. As of July 1, 2009, all S.C. private employers shall be imputed a state employment license, which permits a private employer to employ a person in this state. As of this date, a private employer may not employ a person unless his S.C. employment license is in effect and is not suspended or revoked. The legislation includes civil penalties for violations.

The Employment Eligibility Verification (E-Verify) portion of the bill states that on and after July 1, 2009, all private employers of 100 or more employees who are required by federal law to complete and maintain federal employment eligibility verification forms or documents must register and participate in the E-Verify federal work authorization program and verify the work authorization of every new employee within five days; or employ only workers who, at the time of employment:

- possess a valid S.C. driver's license or identification card;
- are eligible to obtain a S.C. driver's license or identification card;
- or possess a valid driver's license or identification card from another state.

After July 1, 2010, private employers who employ less than 100 employees and who are required by federal law to complete and maintain federal employment eligibility verification forms are given five days in which to complete only the E-Verify option, and during this time the worker may be employed.

The Investigation of Allegations of Violations portion of the bill directs LLR to investigate allegations of violations pertaining to the state employment license or the knowing and intentional employment of unauthorized aliens. LLR shall base determination on any evidence or information collected during the investigation or submitted for consideration by the employer.

The Act stipulates LLR will also:

- Publish a list on its Web site of all private employers who have been assessed a civil penalty, or who have had their licenses disciplined, or revoked.
- Develop a statewide random auditing program to inspect private employers for compliance.

This mandate creates a barrier to our mission because it came to LLR unfunded. LLR is currently developing a budget request for the FY09-10 Budget. The Director of Communications has also been assigned as the contact person for information about the act and is working with staff internally on the implementation of the act.

Other barriers to our mission include:

- The agency is still required to remit 10% of all Professional and Occupational Licensing Programs (POL) expenditures and all excess funds in the Contractor's Licensing Board to the general fund.
- The agency has 122 employees, roughly 41% of our workforce, who are retirement eligible in the next five years.
- The agency needs recurring funds to support the activities of all our response teams, including Urban Search and Response and COBRA teams, needed in emergency situations or in cases of disasters, either man-made or natural.

MAJOR ACHIEVEMENTS

Charleston Fire

The fire at the Carolina Sofa Super Store in June that claimed the lives of nine firemen continued to impact LLR throughout the 2007-08 fiscal year. In June and July of last year, Fire Fighter Mobilization (FFMob) was activated to help with the Charleston FD Line-of-Duty Death (LODD) incident.

FFMob was tasked with two missions during the Charleston LODD incident. The first was providing transportation for the families to and from the memorial service. FFMob tasked 54 FD vehicles and drivers from 31 departments all over the state to fill this request. FFMob regional coordinators Rick Dangerfield and Chuck Black served as staging officers for this mission while Jason Pope represented us in the Command Post. This mission was carried out almost flawlessly.

FFMob's second mission was staffing for city stations during the funerals on Saturday-Monday. FFMob successfully staffed seven stations over a three-day period (nine stations on Sunday); local departments staffed the other city stations. FFMob tasked 92 firefighters from 20 different departments to fill this request. This mission also went very well with only a few minor issues that handled were quickly and efficiently.

LLR through its Firefighter Mobilization (FFMob) program continues its effort to educate the state's fire service on the benefits of this program. FFMob also continues to encourage fire departments to register and list personnel, apparatus and station information to make them a deployable resource during activations. Firefighter Mobilization has grown to include 238 fire departments with 4,114 registered personnel.

FFMob's website has been completely overhauled. The original webpage offered very little information about the program. The re-designed site gives viewers all the information they need to make informed decisions. The new site also includes details about past activations, how to register, and lists specialty resources available through FFMob.

The Office of Occupational Safety and Health (S.C. OSHA) completed its investigation into the fire that claimed the lives of nine City of Charleston Fire Department employees. The following is a summary of the agency's findings.

Accident investigation summary:

On June 18, 2007, the deceased (Bradford Baity, Mike Benke, Melvin Champaign, James Drayton, William Hutchinson, Mark Kelsey, Louis Mulkey, Brandon Thompson and Michael French), employees of the City of Charleston Fire Department, were engaged in interior structural firefighting in a furniture store (Sofa Super Store, 1807 Savannah Highway, Charleston, SC). The store had been converted from a 1960s era grocery store with a metal truss roof system. The fire and smoke spread rapidly, and they became lost and separated from their hoses. With air in air-packs running out, they could not find their way out. They died of smoke inhalation.

City of Charleston Fire Department

Alleged violations and penalties assessed:

Willful violation: Employer knew or should have known that the command system does not provide for the overall safety of emergency personnel and their activities.

Initial penalty: \$7,000

Adjustment: none

Assessed penalty: \$7,000

Serious violation 1: Standard operating procedures were not developed to cover the special hazards associated with fighting and attacking a fire involving a metal truss roof.

Initial penalty: \$1,000

Adjustment: regulatory history

Assessed penalty: \$900

Serious violation 2: Body protection was not required to be worn by nine firemen involved in interior structural firefighting at 1807 Savannah Highway on or about June 18, 2007.

Initial penalty: \$1,000

Adjustment: regulatory history

Assessed penalty: \$900

SC Department of Labor, Licensing and Regulation FY2007-08 Annual Accountability Report

Serious violation 3: Self contained breathing apparatus was not required to be worn at all times by four firemen exposed to smoke and toxic substances while fighting fire at 1807 Savannah Highway, on or about June 18, 2007.

Initial penalty: \$1,000

Adjustment: regulatory history and good faith

Assessed penalty: \$525

City of North Charleston Fire Department

No violations

Charleston County – Awendaw Fire Department

No violations

Summerville Fire Department

No violations

St. Andrews Public Service District Fire Department

No violations

St. Paul Fire Department

No violations

Sofa Super Store

Alleged violations and proposed penalties:

Willful violation: On or about June 18, 2007, exit doors on the front and rear of the warehouse of the establishment were padlocked; two sets of double hung exit doors on the left side of the casual showroom were locked with sliding bolts on the top and bottom of the doors; and exit door on right side of decor showroom of the establishment was padlocked.

Initial penalty: \$49,000

Adjustment: size of employer

Assessed penalty: \$29,400

Serious violation 1: Three fire doors located on the wall between the main showroom and decor showroom were not in proper working order during the fire on or about June 18, 2007.

Initial Penalty: \$7,000

Adjustment: size of employer and regulatory history

Assessed penalty: \$2,500

Serious violation 2: Emergency action plan was not implemented for employees at the establishment.

Initial penalty: \$7,000

Adjustment: size of employer, regulatory history and good faith

Assessed penalty: \$875

POL Process Review Team

LLR continues its efforts to eliminate duplication of services and unreasonable restrictions to practice by improving the processes of the agency. The agency head put together a committee of LLR employees to look at one of the agency's largest and most time-consuming processes – professional and occupational licensing. The committee's charge was to study the licensing process and the number of staff involved in that process.

The POL Process Review team released its report and recommendations to the agency head in April 2008. Based on that information, the agency head decided to dramatically change the structure of the POL division. At the time, licensure functions were done at the board level. The agency head decided to reorganize licensure by creating an Office of Licensure and Compliance. The Office of Investigations and Enforcement was moved from the Office of the General Counsel back to the POL division. A new Office of Administration was also created for the POL division.

The Program Managers for OIE, Licensure and Compliance and Administration are working together and with the Human Resources Director and other appropriate agency staff to assess staffing needs, establish division goals and relocate offices. The implementation of the Office of Licensure and Compliance is in a six phases. They are:

Phase One – identify personnel, job duties and business functions that relate to licensure. Select individuals for the initial transition group.

Phase Two – draw upon the licensure expertise of various experienced staff members in identifying and selecting staff to serve on one of four teams (imaging, renewals, internal/external communication tools and personnel actions)

Phase Three – transition multiple licensing units within an established timeline from various locations to a centralize site with no interruption of services.

Phase Four – implementation of the new licensure sections.

Phase Five – identification of prioritization of information technology that will assist in accomplishing the state goals of the area.

Phase Six – conduct 90-day assessment of the process with critical reviews and timelines for recommended improvements.

Reorganization of the POL division will establish uniform applications of board functions thereby eliminating duplication and reducing costs.

OSHA

The Safetyworks! Campaign, launched in 1999, educates businesses about free services available through the Office of OSHA Voluntary Programs (OVP). In FY08, 5,955 hazards were corrected and over \$2.5 M in fines were saved by South Carolina businesses. Since its inception, 77,348

hazards have been corrected in South Carolina workplaces and businesses have saved over \$34.4 million in fines. South Carolina continues to lead the nation in OSHA state plan states with 48 Palmetto Star sites, despite having the strictest requirements in the nation. This program, which is voluntary, provides recognition to qualified employers who exceed the requirements of the Occupational Safety and Health Act of 1970 in providing their workers a safe and healthy worksite. The OVP office also started the SHARP (Safety and Health Achievement Recognition Program) program in 2006 and currently three companies have received this recognition.

The Survey of Occupational Injuries and Illnesses is a federal/state program in which employer reports are collected and processed by the agency from about 4,600 South Carolina establishments. This annual survey provides estimates of the number and frequency (incidence rates) of workplace injuries and illnesses based on logs kept by employers during the year. These records reflect not only the year's injury and illness experience, but also the employer's understanding of which cases are work related under recordkeeping rules promulgated by the Occupational Safety and Health Administration, (OSHA), US Department of Labor. The number of injuries and illnesses reported in any year can be influenced by the level of economic activity, working conditions, work practices, worker experience and training and the number of hours worked. This year's survey showed that South Carolina's Injury and Illness Rate for 2006 dropped to 3.9 workers per 100 from a high of 4.5 workers per 100 in 2004. SC OSHA met its goal of lowering by 2% the total case rate (TCR) of injuries and illnesses for manufacturing and construction. Our goal in manufacturing for the year was 5.2 days. According to the BLS survey, the TCR for manufacturing in SC was 3.8 days. Our goal for construction was 4.2 days and SC OSHA reduced it to 3.9 days. SC OSHA enforcement and consultation divisions continue to work through our High Hazard Planning Guide to identify industries that have higher injuries rates as outlined in our Strategic Plan. The construction division continues to do drive-by inspections when serious life-threatening hazards are in plain-view.

Comparisons between South Carolina's rate and the national are below:

	South Carolina	All United States
Other services	2.5	3.2
Leisure and hospitality	4.0	4.7
Educational and health services	4.4	5.5
Professional and business services	1.7	2.4
Financial activities	1.0	1.7
Information	2.7	2.1
Trade, transportation, utilities	4.3	5.2
Service providing	3.4	4.1
Manufacturing	4.1	6.3
Construction	3.9	6.3
Natural resources and mining	4.2	5.1
Goods producing	4.0	6.2
Private industry	3.6	4.6

Within state and local government, state government's injury/illness rate was 3.9 in 2006, down from 4.4 in 2004. In FY07 29 fatalities were covered by SC OSHA and the main cause of death was falls. In FY08 35 fatalities were covered by SC OSHA and the main cause of death was struck-by, meaning the employee was either struck by an object (piece of equipment shifted or fell) or moving vehicle (hit by forklift or truck).

V-SAFE Program

The 2007 Session of the South Carolina General Assembly enacted the Volunteer Strategic Assistance and Fire Equipment Pilot Program Law (H3045), providing \$3 million in grants to eligible volunteer and combination fire departments for the purpose of protecting local communities and regional response areas from incidents of fire, hazardous materials, terrorism, and to provide for the safety of volunteer firefighters. The South Carolina Department of Labor, Licensing and Regulation, State Fire Marshal's Office, was charged with administering the grant process to include: 1) developing the grant application package; 2) establishing the criteria for the evaluation of grants as outlined in the law; 3) marketing the information to fire departments; 4) developing a tracking mechanism for expenditures awarded; and 5) reporting this information back to the General Assembly at the close of the funding period.

On January 8, 2008, the application period closed and the grant evaluation phase began. Of the 406 applications submitted by fire departments, 232 were submitted in their entirety. All 232 grants went through a validation process to assure compliance with the legislation, which required their participation in the Firefighter Registration Act and have a Mutual Aid Agreement. Of these 232 applications, 224 met the eligibility requirements and were qualified to be placed in the evaluation process.

The Peer Review Panel assembled in Columbia on January 15 – 17, 2008, to begin the process of evaluating and scoring each application. Each panel member reviewed each application, scored the application in its entirety, and an average score was assigned to each application. Awards were made to the top scoring 104 fire departments, awarding a little over \$2.9 million. The total amount requested by the 224 departments totaled over \$7 million.

Over 1,000 work hours were utilized in the development and implementation of the V-Safe Program and the total cost associated with the administration of this project is approximately \$60,000. The most beneficial outcome of the V-Safe Program is that 104 combination and/or volunteer fire departments are better equipped to provide a safer environment for themselves and the citizens they serve. Indirect benefits include: fire departments participating in the Firefighter Registration Act increased by 25 fire departments; fire departments participating in the SC Fire Incident Reporting System increased by 10 fire departments and fire departments participating in the Mobilization Program increased by 25 departments.

RELAES

LLR completed the implementation of our consolidated licensing and enforcement system, *Regulatory, Licensing and Enforcement System* (ReLAES). This system provides a common database of all POL licensees, the ability to renew on-line and a common licensing system.

SC Department of Labor, Licensing and Regulation FY2007-08 Annual Accountability Report

Currently, on-line renewals are available to 100% of the agency's professional and occupational licensees where licensing requirements permit on-line renewal.

The number of licensees utilizing the on-line renewal process has increased steadily over the past five years. LLR exceeded its goal of increasing the use of online renewals by 10%. Our actual increase from FY05 to FY08 was almost 58%.

<u>Fiscal Year</u>	<u>Renewals Online</u>	<u>Revenue Collected Online</u>
2001	2,278	\$75,711
2002	11,449	\$528,573
2004	22,270	\$1,884,317
2005	29,796	\$4,044,589
2007	79,433	\$8,099,305
2008	125,388	\$11,070,183

USE OF REPORTS

The Accountability Report is used to report the accomplishments of the agency to external entities such as the Governor, Ways & Means Committee and the general public. It is also used to monitor our agency's progress in accomplishing our strategic plan goals and improving our organizational performance.

II. Organizational Profile

- **Main Products and Services and the primary methods by which these are delivered.**

Effective February 1, 1994, Act 181 created the South Carolina Department of Labor, Licensing and Regulation (LLR) which merged the Department of Labor, the State Fire Marshal's Office, the South Carolina Fire Academy and 38 professional and occupational licensing boards into the new agency. Since that time several new boards and advisory committees have been added including Massage Bodywork, Boiler Registration and Dieticians.

The legislation empowered the Governor to appoint a director of the agency with the advice and consent of the Senate.

LLR is organized into five divisions: Fire and Life Safety; Labor; Professional and Occupational Licensing (POL); Legal Services; and Administration.

Major products and services of our agency include:

- Administering laws that pertain to employer/employee relationships such as occupational safety and health, payment of wages, child labor, migrant labor and mediation of disputes between unions and businesses.
 - Inspection and permitting of elevator and amusement rides in South Carolina.
 - Providing courtesy inspections, technical assistance and training to aid the business community in voluntary compliance with all areas of the Occupational Safety and Health Act.
 - Licensing and discipline of numerous occupations and professionals such as accountants, doctors, nurses, massage therapists, barbers, residential builders, etc.
 - Training the state's fire service personnel – paid, volunteer and industrial and other emergency service employees.
 - Ensuring compliance with national and state-adopted fire safety codes and standards.
- **Key Customer Segments and their key requirement and expectations.**
 - **Key Stakeholders**
 - **Key Suppliers and Partners**

Our customers include the 2,000,000 employees of the State, the 100,000 employers, 295,565 licensed professionals, 14,000 firefighters, 450 fire departments, 300 board members of the Professional and Occupational Licensing Division and everyone who is regulated by our statutes. LLR's stakeholders include the citizens of South Carolina and visitors to our State who use the services of those we license and/or regulate. Other stakeholders are the Governor, the State Legislature and State agencies.

- **Operating Locations**
- **Number of employees**

The Fire and Life Safety Division is located in Columbia on Monticello Trail at the State Fire Academy. All other divisions are located at 110 Centerview Drive in the Kingstree Building, also in Columbia.

LLR has 413.91 FTEs, of which three are unclassified. The agency also utilizes the services of approximately 200 temporary employees who are adjunct instructors at the State Fire Academy.

- **Regulatory Environment**

LLR is a cabinet agency that is directly accountable to the Governor. The legislature provides oversight and the agency must comply with the statutes, rules and regulations that govern our operation. In addition, the agency is audited annually by an independent auditor as well as monitored by federal agencies that fund programs in the Labor and Fire and Life Safety divisions. The agency also responds to requests for information, delivers testimony and prepares reports in response to the legislature and Governor.

- **Key Strategic Challenges**

Our key strategic challenges include planning for the possible retirement of over 40% of our workforce in the next five years, finding recurring funding for our response teams and working to pass legislation that our stakeholders are sometimes at odds with because of our regulatory nature.

- **Performance Improvement Systems**

The Director and senior staff develop the strategic plan and set the vision for the agency. Senior staff is involved in the day-to-day operations of the agency and are able to monitor progress and identify problems quickly. Senior staff meets monthly to discuss issues, monitor progress and implement improvements where needed.

- **Organization Structure**

- **Expenditure Appropriations Chart**

Our budget is currently \$34,702,723 of which \$2,703,933 is state funds.

**SC Department of Labor, Licensing and Regulation

* Key Cross-References are a link to the Category 7 - Business Results.
 These References provide a Chart number that is included in the 7th section of this document.

III. ELEMENTS OF MALCOLM BALDRIGE AWARD CRITERIA

CATEGORY 1 - LEADERSHIP

- **How do senior leaders set, deploy and ensure two-way communication for: a) short and long term direction and organizational priorities, b) performance expectations, c) organization values, d) empowerment and innovation, e) organizational and employee learning, and f) ethical behavior?**

Senior staff in the agency communicates short and long term direction through the agency's strategic plan. The Agency Director continually communicates her vision to the agency and ensures progress by establishing objectives and action plans that involve nearly all of the employees of the agency. The strategic plan is tied to every employee's performance evaluation so that there is a clear understanding of expectations.

The organizational values of the agency represent its guiding principles. The intent of the senior staff is to demonstrate the values in all communications and interactions with customers and employees.

- **How do senior leaders establish and promote a focus on customers and other stakeholders?**

The senior staff promotes a focus on customers by establishing customer satisfaction as the one of our key performance measures. The agency's internal newsletter highlights superior service providers. The characteristics they display exemplify the agency's commitment to providing excellent customer service. Each division monitors customer satisfaction. Customer surveys are included on each program's web page. Surveys are also attached to online renewals and requested from every walk-in customer in the POL Division. The Division of Administration conducts formal and informal surveys each year of its internal customers. The Division of Fire and Life Safety conducts on-going course and facility evaluations of the State Fire Academy along with surveys of Fire Marshal inspection clients. The Division of Labor surveys those who receive the services of OSHA Voluntary Programs.

- **How does the organization address the current and potential impact on the public of its products, programs, services, facilities and operations, including associated risks?**

Senior staff addresses current and potential issues affecting the agency by involving themselves in the day-to-day operations of the agency. They review reports, meet with staff and communicate with customers and stakeholders.

- **How do senior leaders maintain fiscal, legal and regulatory accountability?**

The agency's services are mandated by state and federal statutes and rules and regulations. Many of the agency's services require the delivery of a service or product within a specific time frame.

The agency's processes are reviewed both internally and by external parties to ensure accountability.

- **What key performance measures are regularly reviewed by your senior leaders?**

The agency's senior staff monitors performance measures on a regular basis, usually quarterly. Some of the key measures focused on include:

- Processing times for invoices, travel, personnel actions
- Customer Satisfaction Levels
- Processing times for permitting, licensing and investigations functions
- Injury and illness rates for South Carolina's top 5 most hazardous SIC codes
- Fire deaths and their root causes
- Effectiveness of fire safety education and prevention programs
- Turn-around time on investigations and inspections
- Hazards corrected
- % of applications that do not meet criteria for licensure
- Complaints against licensees
- Lapse time between complaint and investigation

Senior staff monitors the impact of our services, enforcement techniques and educational programs. The information is also used as a guide to developing or revising programs or processes that will effectively accomplish our mission. For example, in the OSHA program, the injury and illness rates are monitored quarterly by specific North American Industry Classification System (NAICS) codes and the industries in South Carolina with the highest rates of injury and illness are the focus of consultation services and enforcement inspections in an effort to lower the occurrence rate for that NAICS code.

- **How do senior leaders use organizational performance review findings and employee feedback to improve their own leadership effectiveness and the effectiveness of management throughout the organization? How do their personal actions reflect commitment to the organizational values?**

Senior staff uses performance review findings and employee feedback to improve both the senior staff's and agency's effectiveness. Management receives feedback from employees during scheduled meetings with their staff. The Director has an open door policy. Employees are invited to eat lunch with her to discuss issues they are facing. The Director interviews every employee who leaves LLR. The feedback received is discussed at monthly senior staff meetings. Director Youmans and her senior staff meet regularly with agency boards and their members and associations and advisory committees of the fire service, elevator and amusement ride program and professional and occupational licensees. The feedback received allows us to evaluate our progress and react accordingly

- **How do senior leaders promote and personally participate in succession planning and the development of future organization leaders?**

Senior staff continues to analyze the workforce focusing on those employees retirement eligible within the next 5 years and those employees currently in the Teachers and Employee Retention Incentive (TERI) program. The Human Resources Office updates the agency's color-coded organizational chart and this document is distributed to management annually to assist in human resources forecasting and in assessing staffing needs prior to posting vacancies. Senior staff continues to work with innovative ways to transfer knowledge from those employees who are retirement eligible to those who will remain working for the agency.

LLR has also established the LLR Leaders Program, as part of the agency's training program in an effort to establish a succession pool of potential replacements for critical need positions. The program is a combination of activities that includes a professional certification program, classroom training, field trips, and a work-related project.

- **How do senior leaders create an environment for performance improvement, accomplishment of strategic objectives and innovation?**

Employees are encouraged to participate in local associations related to their profession. Membership in national associations such as the Council on Licensure, Enforcement and Regulation (CLEAR), National Association of Governmental Labor Officials (NAGLO), Occupational Safety and Health State Plan Association (OSHSPA) and National Association of Nursing Board Administrators as well as governmental associations like the SC Government Finance Officers Association (GFOA) and International Personnel Management Association (IPMA) is also encouraged. Several of our employees serve or have served as officers in these organizations.

- **How does senior leadership actively support and strengthen the communities in which your organization operates? Include how senior leaders and employees contribute to improving these communities.**

Senior managers support and encourage employees to get involved with the local community. Agency employees participate in a volunteer employee committee called HOPE (Helping Other People Everywhere). At least once a week throughout the school year, LLR employees read to the children at EE Taylor Elementary. The HOPE Committee also purchased school supplies for the students, purchased cabinets for teachers, and sponsored a field trip to the zoo as well as providing treats for holiday parties and an Angel Tree at Christmas. The HOPE Committee also provides assistance to agency employees and their family members when requested. Other community groups supported include the United Way, American Red Cross, First Ladies' Walk for Cancer and American Cancer Society's Relay for Life.

CATEGORY 2 - STRATEGIC PLANNING

- **What is your Strategic Planning process, including Key participants, Key process steps and how does it address:**
 - a. **Your organization's strengths, weaknesses, opportunities and threats;**
 - b. **Financial, regulatory, societal and other potential risks;**
 - c. **Shifts in technology or the regulatory environment;**
 - d. **Human resource capabilities and needs;**
 - e. **The opportunities and barriers described in the Executive Summary;**
 - f. **Business continuity in emergencies**
 - g. **Your ability to execute the strategic plan.**

The Director and senior staff meet annually to review the strategic plan, update it to reflect accomplishments and revise it to meet the direction she and the senior staff have set for the agency. The strategic plan is communicated to all employees through staff meetings and the agency newsletter.

- **How do you develop and tract action plans that address your key strategic objectives and how do you allocate resources to ensure the accomplishment of these plans?**
- **How do you communicate and deploy your strategic objectives, action plans and related performance measures?**
- **How do you measure progress on your action plans?**

Senior staff prioritizes action plans and establishes deadlines. Senior staff assigns short term strategies to staff. The goals, short term strategies and deadlines are communicated to employees through staff meetings, performance evaluations and agency intranet articles. Budgeting decisions are guided by the priorities of the strategic plan and are allocated appropriately.

- **How do your strategic objectives address the strategic challenges you identified in your Organization Profile?**
- **How do you evaluate and improve you strategic planning process?**

See answer to Questions 2, 3 and 4 above.

- **If your agency's strategic plan is available to the public through the agency's internet homepage, please provide an address for that plan on the website.**

The agency's strategic plan is not on the website.

CATEGORY 3 - CUSTOMER FOCUS

- **How do you determine who your customers are and what their key requirements are?**

The Department of Labor, Licensing and Regulation continues to emphasize the importance of customer satisfaction to all of our employees. Maximizing customer service is a key strategy in our agency's strategic plan.

During the strategic planning process our customers were identified as the following:

- 2,000,000 Employees in South Carolina
- 100,000 Employers in South Carolina
- 300,000 + Licensed Professionals
- 14,000 Firefighters
- 300 Board Members of the Professional and Occupational Licensing Division
- 450 Fire Departments

Senior staff, using tools learned through Malcolm Baldrige training, identified our customers and their key requirements. Below is an example. This list was developed for the Professional and Occupational Licensing Division.

Major Customers	Key Requirements
Applicants	Information on licensing requirements; organized, accurate, simple and timely licensing process
Licensees	Organized, accurate, simple and timely renewal process; fair and timely complaint handling; reasonable/valid continuing education requirements; timely communications
Services Consumers	Thorough and accurate licensing process to ensure public protection; fair and timely complaint handling; reasonably available licensee information; timely communications
General Public	Thorough and accurate licensing process to ensure public protection; fair and timely complaint handling; reasonably available licensing and licensee information; timely communications; prudent use of licensure-generated revenue- cost efficiency and effectiveness
Board Members	Necessary administrative support and oversight; fair and equitable treatment in distribution of available resources
Other state licensing entities	Thorough and accurate licensing process to ensure public protection; fair and timely complaint handling; reasonably available licensee information; timely communications

Students	Information on licensing requirements
Industry	Provide fire and emergency services to industrial plants in emergencies

- **How do you keep your listening and learning methods current with changing customer/business needs and expectations?**

A considerable amount of time is spent meeting with our customers to determine their level of satisfaction, ideas for improvement and expectations of our services. Senior staff meets regularly with agency boards, associations, trade groups and advisory committees of the fire service, elevator and amusement ride program and professional and occupational licensees.

- **How do you use information from customers/stakeholders to keep services or programs relevant and provide for continuous improvement?**

An agency customer satisfaction on-line survey tool was developed and is linked to every program's webpage. Once the survey is completed a copy is sent to the Director's Office, the Deputy Director, Assistant Deputy Director and/or Manager of the program and the Administrator, Strategic Planning. This tool has been extremely useful in gathering information on problem areas regarding our renewal system, our webpage and also with our staff who answer phones and emails. The survey tool has not been a good tool for gauging the overall satisfaction with our agency because for the most part it is filled out by customers who are having problems renewing on line, who have been unable to get information from our staff or on-line or who are dissatisfied with the way they have been treated. The survey tool has been great in insulating problems with our ReLAES system or our WebPages. It has also shown us that we needed to reemphasize our agency's policy of returning calls and emails within a 24-hour period and to stress our agency's value of "treating others with respect."

- **How do you measure customer/stakeholder satisfaction and dissatisfaction and use this information to improve?**

The agency is still looking for that tool or group of tools that will give us an overall customer satisfaction rating. We still collect data by program and division but it is not the same information and therefore can't be used to rate the agency as a whole. One example of customer satisfaction rating is in our OSHA Voluntary Programs where in 2008 an overall satisfaction rating of 100% was received.

- **How do you build positive relationships with customers and stakeholders? Indicate any key distinctions between customer groups.**

Senior management builds positive relationships with its customers and stakeholder in many ways. Administrators meet with associations and trade groups at conferences and seminars. Feedback is received from the numerous advisory groups and partnerships established by the

agency to educate the public on the agency's mission, changes in statute or procedures or to focus attention on public health or protection issues.

CATEGORY 4 - MEASUREMENT, ANALYSIS AND KNOWLEDGE MANAGEMENT

- **How do you decide which operations, processes and systems to measure for tracking financial and operational performance, including progress relative to strategic objectives and action plans?**

Many of the key measures were selected to show our effectiveness in improving the safety and well-being of South Carolina citizens and visitors. These performance measures were chosen because they correlate with our agency's mission and goals and also with our customers' needs. The agency's three strategic objectives of maximizing customer satisfaction, employee satisfaction and the efficient use of resources when identifying key measures were also considered.

- **How do you use data/information analysis to provide effective support for decision making throughout your organization?**

Senior staff receives numerous reports and other information generated either internally or externally on a daily, weekly and monthly basis. This information is used to keep senior staff and managers up to date on issues that might impact the agency and our mission. Senior staff meets monthly to discuss progress made toward completion of our strategic goals, barriers that have arisen and solutions implemented.

- **What are your key measures, how do you review them and how do you keep them current with organizational needs and direction?**

Our key business drivers include:

- Percentage of businesses in voluntary compliance with OSHA
- \$\$\$ saved in OSHA penalties by businesses using OSHA Voluntary Program Services
- South Carolina injury and illness rate
- Customer satisfaction levels
- Processing times for permitting, licensing and investigations functions
- Fire deaths in adults
- Fire deaths in children
- Firefighter deaths
- Students receiving Freddie-in-Schools fire prevention curriculum
- Elevator and amusement ride fatalities
- Number of POL licenses verified by Internet
- Number of POL license applications processed
- % of POL licenses renewed online
- Employee turnover rate
- EPMSs completed on time

- Website Hits
- Fire Academy students
- Fire Code violations corrected
- People reached through Dalmatian Station at Edventure Children's Museum

One of the objectives of our strategic plan is to make sure we are measuring the right things. Do the measures we use correlate to our agency's mission and the needs and desires of our customers? Emphasis has been placed on developing performance measures that accurately measure the effectiveness of our programs, the satisfaction of our customers and the progress we have made in achieving our three strategic objectives.

- **How do you select and use key comparative data and information to support operational and strategic decision making and innovation?**

Data and information used is based on our mission, statute, regulations, rules, customer input, and availability of data. Emphasis is placed on using available resources as responsibly as possible.

To ensure that key requirements are met, data is collected on day-to-day operations agency-wide. There is also direct feedback received via contact with customers and stakeholders. This information is used to change or recommend changes to services or the method(s) in which services are provided.

- **How do you ensure data integrity, timeliness, accuracy, security and availability for decision making?**

Internal processes are well-documented. POL licensing processes have been flowcharted. Every position in the agency has a desk manual. Financial reports are reconciled to the Comptroller General's reports before distribution to management by the 10th of the month.

- **How do you translate organizational performance review findings into priorities for continuous improvement?**

Organizational performance reviews, done externally or internally, are discussed by senior management at their monthly meetings. Deficiencies or opportunities for improvement are evaluated and improved procedures are developed with input from employees and customers. Improved procedures are then communicated to staff through staff meetings or training.

- **How do you collect, transfer and maintain organizational and employee knowledge? How do you identify and share best practices?**

Internal processes are well-documented. All licensing processes have been flowcharted. Every position in the agency has a desk manual.

CATEGORY 5 – WORKFORCE FOCUS

- **How do you organize and manage work: to enable employees to develop and utilize their full potential, aligned with organizational objectives, strategies and action plans; and to promote cooperation, initiative, empowerment, innovation and your desired organizational culture?**

LLR considers our employees our most valuable asset. During the past year our managers have focused on LLR's human resources and the satisfaction of our employees extensively. The human resources system must address needs including effective recruitment; equitable compensation; results-oriented performance management; retention and developmental efforts; and workforce planning. All of these needs are covered by action plans in our strategic planning process.

The agency continues to update its workforce plan to support the agency's strategic plan, to include diversity, succession, retention, and other critical workforce planning needs of the agency. We realize this is a comprehensive, ongoing process that should provide managers with a framework for making informed staffing decisions based on the agency's mission and strategic plan.

The Human Resources Office continues to analyze the workforce focusing on those employees retirement eligible within the next five years and those employees currently in the Teachers and Employee Retention Incentive (TERI) program. The Human Resources Office updates the agency's color-coded organizational chart and this document is distributed to management annually to assist in human resources forecasting and in assessing staffing needs prior to posting vacancies. The agency is in the process of its first wave of retirees from the Executive Management Team. We will continue to work with innovative ways to capture knowledge from targeted critical-need positions to ensure a smooth transition for the remaining workforce.

In February 2008, the agency recognized eight employees who successfully completed the 2007 LLR Leaders Program. This training program is part of the agency's efforts to establish a succession pool of potential replacements for critical need and management positions. This program provides employees who have been identified with high potential and who are interested in pursuing careers in leadership at LLR, the opportunities to develop the skills necessary to function at a higher level of leadership and their abilities utilized throughout the agency.

Since the agency has a pool of 33 graduates who have completed the LLR Leaders Program, no new candidates were sought in 2008. The 33 graduates were offered four advanced training classes to build on the basic management foundation completed through the LLR Leaders Program. We are currently accessing evaluations from the quarterly training workshops and will make further recommendations regarding the program prior to the end of the 2008 calendar year.

The agency continues its coordinated approach to workforce planning. Listed below are some of the agency's workforce planning activities:

- The agency's workforce planning champion continues to work collaboratively with the Workforce Planning Group and the State Office of Human Resources. This group meets quarterly and shares workforce planning information and best practices.
- The agency continues to utilize the TRIBUTE recognition program that recognizes numerous types and levels of employee accomplishments that add value to the agency.
- The agency offers employees a choice of four different flexible work schedules.
- The agency uses the exit interview process that provides data for recruitment and retention issues. During the exit process, the employee meets with the Office of Human Resources and the Agency Director. A process is established to utilize the information collected from the outgoing employee.
- The agency created a partnership with the University of South Carolina for an internship at the Fire Academy.

The agency continues its steady progress towards attaining its affirmative action goals. During the 2007-08 reporting year, the agency reached 87.1% of its goal attainment. While we understand that we are underutilized in white females and black males in the entry-level professional category, black males in the paraprofessional category, and white females in the technician category, we are continually making steps toward achieving the agency's goals.

- **How do you evaluate and improve your organization's human resource related processes?**

LLR continually reviews its human resources processes for improvement. All employees departing the agency meet with the agency head and human resource staff separately during an exit interview and are asked for input. When deficiencies or opportunities for improvement are identified, improved processes are quickly put into place.

- **How do you identify and address key developmental and training needs, including job skills training, performance excellence training, diversity training, management/leadership development, new employee orientation and safety training? How do you evaluate the effectiveness of this education and training and how do you encourage on the job use of the new knowledge and skills?**
- **How does employee training contribute to the achievement of your action plans?**

The agency continues its blended style of training using classroom, eLearning and outside training resources and supports a learning environment from the time employees begin working for LLR throughout their career.

Eighty-five classes/workshops were conducted in the following categories: Executive Management – 2; Supervisory – 24; Technical – 27; General – 32. The agency also presented four mandatory sexual and other harassment training classes.

New online learning programs were offered or enhanced to provide employees with self-paced computer based learning opportunities. The agency's Intranet offers the following eLearning opportunities for employees: Professional Communication; Introduction to RELEAS, Supervisory eLeave training, Drug-free Workplace for Non-supervisory and Supervisory Staff, How to Write Effective Board Meeting Minutes, Anti-harassment/Anti-diversity Training, How to Write a Position Description, Position Description Resource Manual, Supervisory Survival Challenge (OHR), EPMS Online Training and Performance Competency Directory (OHR).

The training coordinator is working with a core group of employees who are subject matter experts for the agency's ReLAES program to establish and development job aids, tutorials, manuals and training for the ReLAES program. The human resources administrator is assisting with this project.

The agency continues to use the State Agency Training Consortium (SATC), the State Office of Human Resources, the Certified Public Managers (CPM) and the Associate Public Managers (APM) programs, the Governor's Executive Institute, local technical school, and other agencies as resources for employee training. The State Fire Academy also provided fire extinguisher training for 31 LLR employees.

- **How does your employee performance management system, including feedback to and from employees, support high performance and contribute to the achievement of your action plans?**

One of the most important methods of encouraging and motivating employees is through the Employee Performance Management System (EPMS). The agency has maintained its goal of 100% participation in the EPMS process for the September 16, 2007 Universal Review Date period. The agency continues to audit EPMS evaluations as they are submitted to the Human Resources office for linkage of employee performance to the strategic plan.

During the EPMS on-going communication stage, supervisors were encouraged to meet informally with employees each quarter or at least a minimum of once during the EPMS appraisal period to discuss their positive performance, listen to any concerns and provide constructive feedback. For supervisors' convenience, an electronic form was created to document the informal coaching sessions.

The Human Resources office also met with supervisors to discuss the total EPMS process and to develop elements and standards that measure employee accomplishments and that set performance expectations and goals for all employees.

- **How do you motivate your employees to develop and utilize their full potential?**

LLR recognizes that employee contributions and accomplishments are an important part of creating the quality culture desired at LLR. When employees know that their efforts are appreciated, their self-esteem and job satisfaction increases; and an improved attitude increases job productivity. The LLR Recognition Committee, with help from B&C Board staff, created a program titled TRIBUTE, which is the acronym for Timely Recognition Inspired By Uniquely Talented Employees. The TRIBUTE program consists of three recognition components to recognize employees: employee-to-employee, supervisor-to-employee, and management-to-employee. The program has minimal costs and is simple to implement and operate. To date, 336 Tributes have been given.

During “Public Service Recognition Week,” LLR’s senior staff hosts an agency-wide picnic to recognize LLR employees and the outstanding job they do. This year the picnic committee put together a Wii Olympics that had teams from all program areas competing.

- **What formal and/or informal assessment methods and measures do you use to determine employee well being, satisfaction and motivation? How do you use other measures such as employee retention and grievances? How do you determine priorities for improvement?**

LLR measures employee well being, satisfaction and motivation through a number of ways. The agency monitors its turnover rate, utilizes confidential email suggestions, conducts monthly staff meetings and exit interviews with departing employees to help monitor employee satisfaction, well being and motivation.

- **How do you maintain a safe, secure and healthy work environment? (Include your workplace preparedness for emergencies and disasters.)**

LLR continues to offer programs that improve the well-being of our employees. These include:

- Weight Watchers Program
- Flex Time
- Yoga Classes
- Line-Dancing Classes
- Benefits Fair and Pre-Retirement Seminar
- Lunch n’ Learn Programs

Senior staff is responsible for meeting all safety requirements. Workplace safety information is posted on agency bulletin boards. Fire extinguisher training has been provided to 31 employees. Fire wardens have been established in case of fire or other emergencies to ensure all employees safely get out of the building.

Agency staff, through the Fire and Life Safety, POL and Labor Divisions, participate in numerous ESF established by the Emergency Preparedness Division. We coordinate Firefighter

Mobilization involving USAR and COBRA teams for events involving disasters, both man-made and natural. Our agency also has workplace preparedness plans for the handling of agency business in an emergency or disaster, including the installation of a redundant computer site at the State Fire Academy that would handle all agency on-line transactions if the main site was lost.

CATEGORY 6 - PROCESS MANAGEMENT

- **How do you determine, and what are your key processes that produce, create or add value for your customers and organization? How do you ensure that these processes are used?**

Most of the agency's key processes are mandated by statute. The key processes include the regulation of worksites and businesses, licensing of professions and occupations and training.

- **How do you incorporate organizational knowledge, new technology, changing customer and mission-related requirements, cost controls, and other efficiency and effectiveness factors such as cycle time into process design and delivery?**

LLR remains committed to improving our processes. The strategic plan charges each division with systematically conducting periodic process reviews in units across the agency to identify "model processes" and processes that need improvement. This provides divisions with factual information and comparison statistics for use in managing continuous improvement.

- **How does your day-to-day operation of these processes ensure meeting key performance requirements?**

Senior staff communicates key performance requirements to staff through their planning stages and performance reviews. Senior staff also reviews the effectiveness, timeliness and quality of agency products. Any issues in performance are quickly corrected.

- **How do you systematically evaluate and improve your key product and service related processes?**

To reach our goal of efficient use of resources and to improve the delivery of our services, a unified agency Information Technology (IT) strategy and platform has been implemented. This plan supports the business needs of our employees and managers in all divisions, as well as enhancing the level of service received by our customers.

The most significant component of this strategy is the consolidated licensing system, *Regulatory, Licensing and Enforcement System* (ReLAES), which provides a common database of all POL licensees, the ability to renew on-line and a common licensing system. Currently, 100% of all POL licensees are on the ReLAES system and have the ability to renew their licenses on-line.

Numerous work forms have been converted to word processing templates. Along with the work forms, agency newsletters, brochures, codes of laws, etc. have also been added to the website. By allowing our customers to view, download and print these documents on an as-needed basis we save staff, printing and postage costs. It has also allowed the documents to be submitted electronically. Agency-wide, the cost for printing has decreased by 38% from FY03 expenditures. Postage has decreased by 25%.

Another initiative, Licensee Lookup, continues to save the agency thousands of dollars in staff and associated printing and postage costs. It allows licensee verifications to be done electronically without the intervention of LLR staff. While saving thousands of dollars in personnel and operating costs, it has also brought an essential public service directly to the desktops of customers and constituents. This year there have been over 18 million verifications done electronically on our licensees.

A link has been established on our Intranet site where employees could make suggestions on ways to save money agency-wide. All suggestions are analyzed and implemented where appropriate. The agency's funding sources are complicated and for the most part funds cannot legally be moved from one program area of the agency to another. While the cost-savings suggested for POL and Fire and Life Safety may not directly be used to offset general fund budget reductions, these savings are still extremely important to LLR as guardians of the citizen's tax dollars.

- **What are your key support processes, and how do you improve and update these processes to achieve better performance?**

In our continuing effort to constantly review our processes and resources to make sure we are operating in the most efficient manner possible the agency head recently put together a committee of LLR employees to look at one of the agency's largest and most time-consuming processes – POL licensing. The committee's charge is to study the licensing process and the number of staff involved in that process.

The committee has been gathering information over the past several months at the direction of Nathan Strong with the Budget and Control Board's Office of Human Resources (OHR). OHR staff has been working with the committee members and ultimately will look at all the information the committee gathers. A recommendation to the agency head will be made by January 2008 on a more efficient licensing process.

The POL project team currently is flowcharting new and renewal application processes for each board. The team has met individually with board administrators and employees who directly handle and process new and renewal applications. In assessing the licensing process, the team asks specific questions such as how the licensing process works, the number of staff involved, and how the process could work more efficiently. During each meeting, the application process is flowcharted using Visio software. At a later date, team members meet individually with each employee involved in the process to verify the flowchart and make any changes/additions/deletions.

- **How does your organization determine the resources needed to meet current and projected budget and financial obligations?**

Senior staff meets with its managers to develop budgets, identify funding opportunities and review revenue streams. Requests for additional funds are made through the state budgeting process and through federal grant submissions.

CATEGORY 7 - RESULTS

Employee Satisfaction

Chart 3.1

	FY04	FY06	FY08
Employee Turnover Rate	5.38%	12.43%	8.3%

Other Accomplishments/Initiatives:

- Implementation of the Workforce Planning Needs Plan continued.
- Career paths were developed for targeted job classifications.
- Every employee’s EPMS continues to be tied to the agency’s strategic plan.
- Reward and Recognition Plan (TRIBUTE) has awarded 336 Tributes since its inception.
- Agency hosted an employee appreciation luncheon.

Supplier/Contractor/Partner

During the past year, LLR partnered with organizations in both the private and public sectors to promote a better understanding of the agency's mission and program goals and to enhance our identity. This included:

- Several employees served as task force and committee members for organizations such as CLEAR, the SC Chamber of Commerce, the American Society of Safety Engineers, NCARB and SC Minority Affairs Commission.
- SC OSHA is one of four state-plan states to be asked to participate in the Federal OSHA Data Collection System redesign. Only SC and NC were asked to include both the Enforcement and Consultation division. LLR's five-member team will attend the training sessions in Washington, DC in September and begin actively entering data under the pilot in October. LLR continues to be in discussions with the computer design team from Minnesota to develop our own "state-specific" data information system. LLR will evaluate both programs and select the one that is the best economical and technically feasible for SCOSHA.
- The S.C. Fire Academy and State USAR Team have a new airplane prop to be used for training. The Mitsubishi MU2 Aircraft, donated by Mike Laver of Air 1st Aviation Companies of Aiken, is a twin engine turboprop aircraft has a seven-passenger capacity. The aircraft will give our rescuers advanced hands-on training for handling aircraft fuselage and for extricating patients from them. In the immediate future, the aircraft will serve as a training aid for both the US&R Team and aircraft firefighting personnel training at the Fire Academy. The long-term use is for it to become a key element in the Fire Academy's Homeland Security Structural Collapse scenario prop that is being reconditioned this year. Several people and groups came together to get the airplane delivered from Aiken to the Fire Academy headquarters in Columbia. Jim Hamilton of Columbia Owens Downtown Airport orchestrated the transport. Jim St. Clair served as the military liaison. Squadron at McEntire Joint National Guard Base de-assembled the aircraft for transport and performed the subsequent re-assembly at the S.C. Fire Academy. The S.C. Army National Guard's 122nd Engineer Battalion
- LLR's Fire Educators Officers, utilizing the EdVenture Children's Museum, exceeded their targeted goal of 25% in outreach presentations to schools. Many of these programs for schools were supported by independent grants via EdVenture. In addition, the Spray it Forward Program was delivered statewide to nearly 2,000 firefighters to train them to deliver programs to educational occupancies within their area. Equipping firefighters with learning and behavioral objectives to train children in all areas of injury prevention has assisted in reducing child injuries and deaths throughout the state.
- LLR's alliance with the SC Residential Home Builders is a continuing effort to reduce accidents/fatalities due to falls on construction sites. The Home Builders Association of South Carolina, comprised of homebuilders and others in the building industry, strives to

benefit the building industry and the community as a whole. The alliance will use its collective expertise to help foster a culture of prevention while sharing best practices and technical knowledge. Alliance members share information, guidance and access to training resources that will help protect employees' health and safety, particularly in reducing and preventing exposure to hazards associated with residential builders' jobsites.

The alliance will work together to achieve the following training and education goals:

- Conduct fall protection, excavation, worksite maintenance and other seminars to provide expertise in communicating such information to employers and employees in the industry and their sub-contractors, and deliver or arrange for the delivery of residential builders awareness seminars.
- Encourage participating contractors to include an announcement of the alliance on their jobsites and Websites, if applicable, and through internal communication.
- Encourage participating contractors to conduct a minimum of 10 hours of OSHA training from a qualified source on various hazards related to the residential builders' jobsite.

Regulatory and Legal Compliance and Citizenship

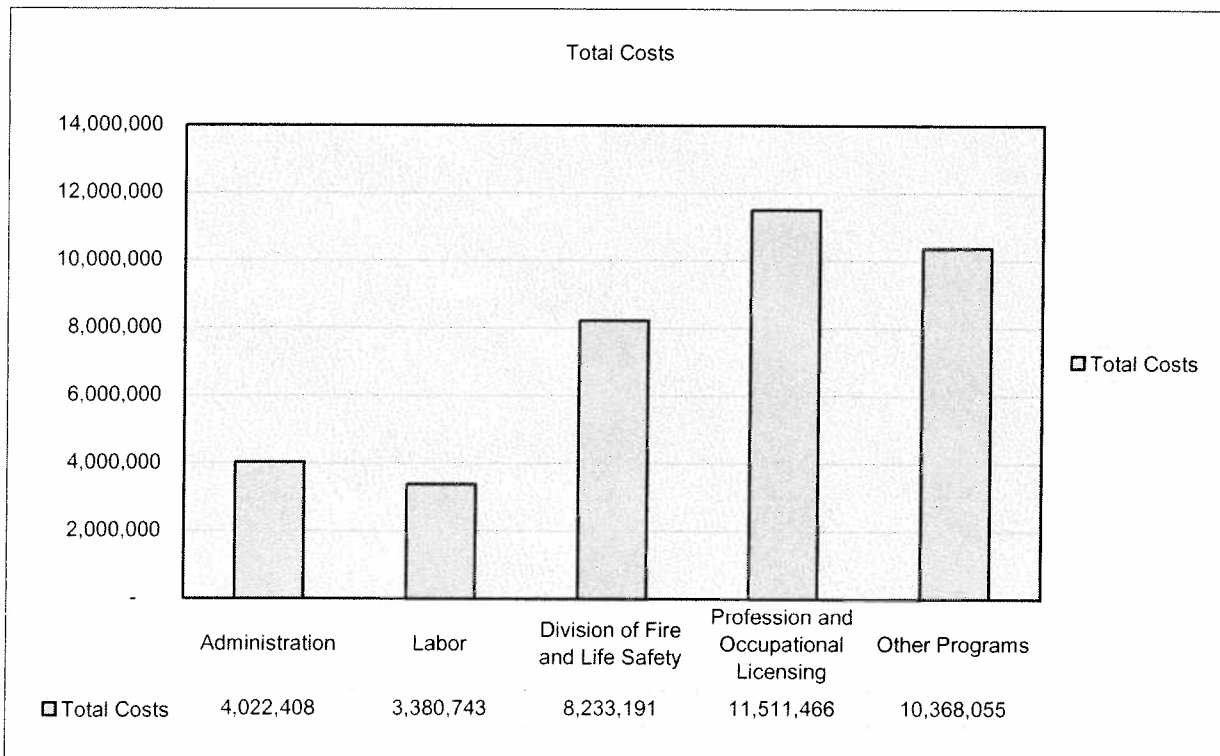

- Audits have been conducted by both state and federal entities for compliance with state and federal laws, mandates and regulations. No major audit findings or defects have been reported.
- Our employees have adopted the first graders at E. E. Taylor Elementary School. This year we sponsored performances at the Koger Center and the Marionette Theatre. The committee in charge of these activities raises monies to support their efforts through employee fish-fry book and bake sales. Monetary support is also provided to LLR employees and their families during crisis situations. Other community groups supported include the United Way, American Red Cross, First Ladies' Walk for Cancer and American Cancer Society's Relay for Life.

Financial Performance

- Many innovative measures were continued in FY08; such emailing of board minutes and board hearing paperwork, the elimination of renewal notices to licensees and the implementation of an agency motor vehicle pool. As a result, LLR’s operating expenditures continue to decrease. LLR also increased the number of agency publications available on-line thus reducing printing and mailing costs and also making the information more readily available to the public. These publications include newsletters, brochures, law books and workplace posters.

Category	FY03 Expenditures	FY08 Expenditures	% Decrease
