

The State Fire Marshal's Office has implemented a new permit system to be used for the upcoming fireworks season to ensure stands are inspected consistently. The 2011 permit will be color-coded and posted on the outside of each stand and will include the assigned permit number and issue date.

Before permitted to sell fireworks, all temporary (90 days) stands must have the appropriate permit (blue or red) posted. Attached is a copy of each permit to be used this year.

If you locate a fireworks stand without a 2011 permit, please contact Frank Maples, State Board of Pyrotechnic Safety administrator, at 803-896-9913 or by cell at 803-413-6064.
